I understand that I am applying for CUP water to lease. I will be entitled to an average of this amount of CUP Water determined by the CUWCD Board each year, less losses. The costs & delivery fees will be billed annually beginning 2022 and must be paid throughout the term of the lease, regardless of whether all or any part of the CUP water is used. Your canal company may also charge a delivery fee. The CUP Water will be used for irrigation on the number of acres of eligible lands approved by CUWCD, and the SVP Water will be used first. I will not be able to carry over or hold water from year to year. I can terminate the lease with a 60 day written notice, however past due balances must be paid.
